ERASMUS COURSE on

OBJECTIVE

The course is open to radiologists, cardiologists, internists, pediatricians, rheumatologists, and cardiac surgeons, as well as residents, technologists, and nurses who already practice, or intend to practice, cardiovascular magnetic resonance (CMR) in their clinical activity. It is also aimed at all clinicians who use CMR as a key instrument to manage their own patients (cardiologists, cardiac surgeons, sports physicians, pediatricians, rheumatologists, hematologists, internal physicians, general practitioners).

Key words: multimodality perspective; clinical vision; innovation; artificial and human intelligence.
